- Kitchen Refurbish – Infrastructural Support
- Children’s Day celebration
- Planting Trees at School

At DTICI we firmly believe our actions today impact future outcomes, whether from a technological standpoint or a humanitarian one.

To reinforce this conviction, the *IT department* zoned in on a department outing with a different flavor. Soaking in Bengaluru's soothing morning drizzle, the team made its way to the Morarji Desai Residential School, Sulibele, to break out the sunshine on a cloudy day. Seeing as November 14 is Children's Day in India, the occasion could not have been more suitable.

A variety of sporting spectacles and an exchange of life experiences between the students and the IT leadership team ensued before all participants retreated with big smiles and full hearts.

Morarji Desai Residential School : Kitchen Renovation Project

One of the core commitments of the DTICI CSR Foundation lies in uplifting school infrastructure where it's needed most. At Morarji Desai Residential School in Sulibele, Karnataka, a critical transformation is underway—the school's dilapidated kitchen is being completely rebuilt and expanded. This is more than just bricks and mortar; it's about dignity, nourishment, and hope.

The current kitchen, in its poor condition, has long posed health risks to the dedicated staff who work tirelessly behind the scenes. This project aims to give them a safer, more dignified environment—because nurturing minds begins with nourishing bodies, and that includes the wellbeing of those who make it all possible.
