Manipal Academy of Higher Education (MAHE) has embedded diversity, equity, and inclusion as core priorities across all institutional policies and practices, with a dedicated focus on advancing women in STEM. The institution's approach has evolved from Women's Development to Women-led Development, ensuring that women are not only supported but also empowered to lead.

Through comprehensive leadership development programs, MAHE has consistently elevated women to administrative and strategic leadership roles. All faculty development initiatives are designed with a strong emphasis on encouraging and retaining women in STEM fields. Beyond academic support, MAHE invests in mentorship, skill-building, counselling programmes, and capacity development workshops, while also strengthening care infrastructure and implementing progressive leave and work-life balance policies to enable women's professional growth.

As a knowledge partner of W20, the official G20 engagement group on gender equity, MAHE contributes to global advocacy for women's empowerment. The institution actively supports national initiatives such as Women Scientist and DST-Inspire, and regularly conducts gender sensitization programmes to foster inclusive mindsets and equitable work environments.

MAHE's Faculty Empowerment Scheme, research facilitation policies, and non-discrimination frameworks ensure sustained advancement of women in STEM. Various institutes under MAHE host seminars, conferences, and research projects on gender-related issues including mental health of women, women and law, public health policies, digital safety for women, family planning, fertility trends, and representation in medical curricula.

In alignment with Sustainable Development Goal 5 (Gender Equality), MAHE ensures equal access to education and research opportunities for women and girls, maintains a safe and enabling campus environment, and continually strengthens maternity, access, and tracking policies to measure and improve gender equity outcomes.

Through these sustained initiatives, MAHE remains committed to building a diverse, inclusive, and empowered STEM workforce where women thrive as innovators, leaders, and change-makers.
