Rebuilding Futures:
KONE India Inaugurates New Primary School in Greater Noida

There are projects that add infrastructure, and then there are projects that restore confidence in public spaces meant for children. The newly inaugurated **Government Primary School at Prathmik Vidhayala, Haldauni, Greater Noida**, stands as one such transformation.

Under KONE India's CSR initiative, the earlier ageing and deteriorated school at Prathmik Vidhayala, Haldauni was completely demolished and rebuilt from the ground up into a modern learning facility designed to serve the community for years to come. What now stands in its place is not just a new building, but a significantly improved environment where children can learn with greater safety, dignity, and comfort.

The reconstructed campus comprises 6 classrooms supported by upgraded WASH infrastructure, improved ventilation, tiled interiors, and modern amenities aimed at creating a more conducive and student-friendly learning experience. With an huge project investment the initiative is expected to positively impact nearly 350+ students.

The school was inaugurated by our MD **Amit Gossain along with Anil Kumar Chammalwan – RD North** in the presence of **Sulabh Mathur – DGM- Business Partner P&C, Raj Kumar Pandey – DGM , Atul Asthana, DGM & Ankita Joshi - Senior Manager, COE Communications**, with the project stakeholders, and several team members who played a key role throughout the project lifecycle.

As the doors of the newly constructed school open to students, the project marks another meaningful step in KONE India's continued commitment towards strengthening educational infrastructure and enabling lasting community impact through thoughtfully executed CSR initiatives. Every classroom, corridor, sanitation facility, and finished space represents an investment into the everyday experience of a child walking into school.

KEI CSR Update

Sustainable learning spaces.. KONE India's gift to the future

KONE India CSR, we believe in shaping a better future through education and sustainability. As part of our CSR initiatives, we have transformed **Mannivakkam Government Higher Secondary School** by developing six well-equipped classrooms and a stage, creating an inspiring learning environment for students.

Taking a step towards sustainability, we have also installed **solar energy**, making the school self-sufficient in power while reducing its carbon footprint. This initiative not only supports education but also fosters awareness of renewable energy and environmental conservation among young minds.

The newly developed infrastructure was inaugurated by **Saravanan M P**, Director – P&C, and **Krishnakumar CVS**, Director – Legal, Compliance & Corporate Affairs, reinforcing KONE's commitment to **empowering communities and building a sustainable future**.

Together, we continue to make a difference!

EmpowerHER: Advancing Menstrual Hygiene, Dignity and Equal Opportunity for Girls

When a girl has access to menstrual hygiene facilities, she gains more than a product — she gains dignity, confidence and the opportunity to learn without barriers.

Through **EmpowerHER** Project, KONE India CSR is taking meaningful steps towards improving menstrual hygiene management in government schools, helping young girls access essential hygiene products and ensuring safe, hygienic disposal. By installing sanitary napkin vending machines and incinerators, the initiative aims to create healthier, safer and more supportive learning environments.

The project has reached Indore and Nagpur, extending access to essential menstrual hygiene infrastructure across government schools.

Indore: The project was inaugurated across 10 Government Schools by **Rahul Tiwari, Indore Branch Manager, and Amit Patel, Service Manager, along** with his team. The initiative is expected to benefit 2,000+ girls, promoting better menstrual hygiene practices and supporting their health and well-being.

Nagpur: The project was inaugurated at 2 out of the 12 identified Government Schools by **Ashutosh Sharma, Nagpur Branch Manager, along with Ruchi Sharma, Manager – CSR.** The rollout will continue across the remaining identified schools, extending access to essential menstrual hygiene facilities to more girls.

Beyond infrastructure, EmpowerHER seeks to foster awareness, break the stigma surrounding menstruation and encourage girls to manage their menstrual health with confidence and dignity.

At KONE India, we believe that menstrual hygiene is fundamental to health, dignity and equal opportunity. By addressing everyday barriers, we strive to create an environment where every girl can focus on her education, pursue her aspirations and realize her full potential.

Empowering girls. Breaking barriers. Building a healthier, more inclusive future.
